019CG KILAV SCHIUMA COLOR GIALLO

SELF-POLISHING PRE-WASHING DETERGENT, WITH COLOURED FOAM

Technical information

Self-polishing detergent with coloured foam, for quick washing of cars, trucks, tanks, fit to remove hard stains. Thanks to the surface active agents here contained, the product is a good self-polisher. The chemical composition is based on first-rate vegetable raw materials, respectful of the environment. Used where a fast and strong washing power along with a polishing and protective action are required. Notwithstanding the product's alkaline composition, if correctly used, no danger has been found on varnishes of any kind. The external temperature does not hinder the correct use of the product.
It can be used both through sprayers and by car-washing plants.

CHEMICAL COMPOSITION: Anionic non ionic surface active agents, alkalizing agents, polishing agents, sequestering agents, special reactants, dyes, water.

PH: ph 11 in dilution 1:20 with water

DIRECTIONS FOR USE:
 WITH SPRAYER: Thin the product 1:30-60 with water, spray uniformly over the surface and rinse abundantly cold. For engines or very dirt surfaces thin the product 1:10-15 with water.
 WITH ROBOT EQUIPMENT: Intake the pure product. The last dilution with water must be 1:30-60.
 WITH HIGH-PRESSURE CLEANER: Thin the product 1:15-30 with water. Intake the product with the proper equipment for detergents. Choose the fittest temperature in accordance with the type of surface to clean, rinse.

WARNING: be careful: in order to achieve the best coloured foam, the product should be diluted at least one hour before use. Do not exceed the highest suggested dilution.

PACKAGE: canisters size kg. 12-25
