242 RENEW

Technical information

Special renewer for the new painted bumpers, which can be damaged while parking, thus giving the car a “shabby” look. It removes stripes and spots left by insects and mosquitoes on the car-body. It renews, cleans, protects painted bumpers and car-bodies of any kind. Besides removing spots of varnishes on the bumpers, it removes the small scratches caused by scraping.

CHEMICAL COMPOSITION: Mixture of non ionic tensides, reactive silicones, non aromatic solvents, strong waxes, adjuvants, water.

PH: 8,5

DIRECTIONS FOR USE: spread with a cloth or cotton wool on the painted bumper, above all on the spots or scratches, then pass again with a dry cloth removing all the product from the surface. Work on half bumper each time. Always use a soft cloth (possibly cotton-made), so as to avoid scrapes.

WARNING: no danger if the suggested directions are followed.

PACKAGE: cartons pcs. 24 X 200 ML – cartons pcs. 12 X 500 ML
